

CHAPTER... ...TWO

Zac raced to his backpack, and pulled out a small electronic device that looked a bit like a video game console.

This was Zac's new SpyPad, the Pulsetronic V-66. It did play video games, but it was also a phone, a code breaker, a laser, and just about everything else a spy could need.

Zac slipped the disk into his SpyPad.

CLASSIFIED

MESSAGE INITIATED 3:00 P.M.
CURRENT TIME 3:33 P.M.

GIB has received a distress call from Agent Hot Shot, who is stationed on a small volcanic island called the Isle of Magma.

Agent Hot Shot reports that the island has become extremely active, and may erupt as soon as tomorrow afternoon.

He needs immediate assistance.

A cloaked GIB jet is waiting for you behind the slide in the playground.

Your mission is to locate and rescue Agent Hot Shot.

MISSION TIME REMAINING:
23 HOURS 27 MINUTES
