

# How to make a rain stick/shaker

① Take an EMPTY crisp tube and make sure the inside is clean. Give it a good wipe to get rid of any crisp crumbs. Take off the lid.

② To decorate your shaker, measure a piece of paper to fit around the outside of the tube.

③ Then colour in the paper and put it to one side.

④ Take some dry rice and a plastic funnel and put the funnel into the top of the tube. Then pour in the rice - don't overfill it or the shaker won't make a good noise.

⑤ Once that's done, you'll need to tape the lid back on very securely with lots of tape so it doesn't fall off.

Don't overfill. Up to about here.
